

ANSON POON

SOFTWARE ENGINEER

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

League Inc. | Apr 2019 - Now

- Lead front end development for multiple projects in React, Redux, Redux-Saga & Styled Components with a focus on functional programming principles
- Developed multiple high impact features for the League web application including the Home Feed, Health Programs and Marketplace
- Built League's Genesis design system with a focus on developer experience and accessibility. Organized the internal team, hackathon, component documentation in Storybook and created the website using Gatsby, NetlifyCMS and Netlify
- Worked closely with Product Designers to create accessible, reusable & delightful designs and document Genesis design system components, brand elements & design tokens
- Facilitated qualitative user interviews to gather UX feedback & create user personas
- Worked with multiple stakeholders across Product, Design, Data & Engineering teams to gather requirements and organize and lead agile scrum rituals for the team
- Mentored and onboarded junior developers and co-ops to help grow their careers and technical skills

SOFTWARE ENGINEER

Rubikloud Technologies | Mar 2017 - Mar 2019

- Built & lead front end development projects in React, Redux & Redux-Saga
- Collaborated with Back End and Data Engineers to create RESTful APIs & database models
